About anic GmbH

Since the year 2000, anic GmbH has excelled in IT project management and software development, particularly in the chemical and pharmaceutical sectors. We offer IT consulting in R&D, process engineering, manufacturing, and GxP-compliant IT/OT solutions. Our mission is to deliver tailored, high-quality IT solutions that perfectly meet our clients' needs.

What is anicors?

anicors is a cutting-edge IT solution designed to streamline the supply chain, the management and ordering of chemical substances. Developed by anic GmbH, it offers a comprehensive suite of tools to facilitate the easy search, storage, and ordering of chemicals, including hazardous and controlled substances.

Key Features

- **Ready for Mobile Devices:** Manage your inventory on-the-go with your mobile device.
- **One-Click Ordering:** Effortlessly add or remove items from your stores or order them from your chemical catalogs.
- **Catalog Management:** Integrate the suppliers' catalogs of your choice easily into the solution for your users' convenience.
- **Chemical and Text Search Function:** Quickly find chemical substances based on the chemical structure or any other property like CAS number in one of the largest and freely customizable catalog databases (+10 million chemical substances) and order with "one-click".
- **Interfaces to your Systems:** Integrate seamlessly into your IT-Landscape.
- **Compatible with most Logistics and Storage Management Systems:** Automate storage and retrieval processes.
- **AI is coming soon!**

Why Choose anicors?

What is the value of choosing anicors? A uniformed supply chain system leads to more efficiency. With anicors, you can improve inventory management and reduce unnecessary orders with a clear overview of in-house stocks. Keep track of your inventory on-the-run with your mobile applications. And finally, it fits perfectly into the existing workflow.
